Independent Limited Assurance Report

ERM Certification and Verification Services Limited ("ERM CVS") was engaged by Ardagh Glass Packaging Sarl ("Ardagh") to provide limited assurance in relation to the Ardagh Metal Packaging Product Carbon Footprint Methodology Version 2.0, June 2026 (the "Methodology").

ENGAGEMENT SUMMARY

Scope of our assurance engagement	Whether the Methodology is in accordance with the mandatory "shall" requirements within the reporting criteria. Our assurance engagement does not extend to information in respect any other versions of the methodology or to any other information included in the Methodology.
Reporting period	Not Applicable
Reporting criteria	• ISO 14067:2018 Greenhouse gases — Carbon footprint of products — Requirements and guidelines for quantification; and • Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard (2011) • PACT Methodology for Product Carbon Footprints
Assurance standard and level of assurance	We performed a limited assurance engagement, in accordance with the International Standard on Assurance Engagements ISAE 3000 (Revised) 'Assurance Engagements other than Audits or Reviews of Historical Financial Information'. The procedures performed in a limited assurance engagement vary in nature and timing from and are less in extent than for a reasonable assurance engagement and consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.
Respective responsibilities	Ardagh is responsible for preparing the Methodology and for the collection and presentation of the information within it. ERM CVS' responsibility is to provide a conclusion to Ardagh on the agreed assurance scope based on our engagement terms with Ardagh, the assurance activities performed and exercising our professional judgement.

OUR CONCLUSION

Based on our activities, as described on the next page, nothing has come to our attention to indicate that the Methodology is not in accordance with the mandatory "shall" requirements within the reporting criteria in all material respects.

OUR ASSURANCE ACTIVITIES

Considering the level of assurance and our assessment of the risk of material misstatement of the Methodology a multi-disciplinary team of sustainability and assurance specialists performed a range of procedures that included, but was not restricted to, the following:

- Evaluating the appropriateness of the reporting criteria for the Methodology;
- Evaluating the Methodology against the "shall" requirements of the reporting criteria;
- Interviewing the Ardagh team and external consultants to understand the application of the Methodology, management of system boundaries, functional / declared units, cut-off criteria, data quality, and general clarifications on the Methodology;
- Evaluating suitability of reporting criteria and reasonableness of assumptions, including application of the Methodology to resolve boundaries, technical basis, and chain of custody approaches (e.g. geographic challenge, dilution challenge, and other relevant considerations);
- Reviewing completeness and auditability of Methodology, including clarity, consistency, and relevance; and
- Reviewing of the excel based Product Carbon Footprint (PCF) tool and 2025 PCF PowerBi extract used by Ardagh to confirm consistency with our findings.

THE LIMITATIONS OF OUR ENGAGEMENT

The reliability of the Methodology is subject to inherent uncertainties, given the available methods for determining, calculating or estimating the underlying information. It is important to understand our assurance conclusions in this context.

Ardagh and its Clients shall not infer any output from the use of the Methodology as independently assured or verified. Any partial PCF may also be independently assured to ascertain conformance to the Methodology.

OUR INDEPENDENCE, INTEGRITY AND QUALITY CONTROL

ERM CVS is an independent certification and verification body accredited by UKAS to ISO 17021:2015. Accordingly, we maintain a comprehensive system of quality control, including documented policies and procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements. Our quality management system is at least as demanding as the relevant sections of ISQM-1 and ISQM-2 (2022).

ERM CVS applies a Code of Conduct and related policies to ensure that its employees maintain integrity, objectivity, professional competence and high ethical standards in their work. Our processes are designed and implemented to ensure that the work we undertake is objective, impartial and free from bias and conflict of interest. Our certified management system covers independence and ethical requirements that are at least as demanding as the relevant sections of the IESBA Code relating to assurance engagements.

ERM CVS has extensive experience in conducting assurance on environmental, social, ethical and health and safety information, systems and processes, and provides no consultancy related services to Ardagh in any respect.
